Ungar, Michael. *Change Your World: The Science of Resilience and the True Path to Success*. Second Edition, Sutherland House, 2019.

“The science of resilience shows us that our lives can get better, and most people's lives do get better, but not because of what motivational speakers are selling. It is true that as human beings, we have internal resources to help us thrive in the most emotionally and physically damaging situations, but those internal resources are seldom of much use unless we are also given the external resources we need to succeed. Here's the problem in a nutshell: we have fallen in love with the persona of the rugged individual. We need to give more consideration to the resourced individual. Rugged individuals make great television; resourced individuals make good science.” – *Change Your World*
