Existing Plants: Landscape Values Worksheet

20 minutes

Instructions:

What plants do you have in your landscape? What is their value? Values are subjective. A plant may be more valuable to a homeowner because it is their favorite flower, but their housemate may hate it because they have to trim/pick up leaf litter. You might love a wildflower, but your neighbor might view it as a weed. Consider a shrub, vine, tree or perennial in your garden and list its qualities below.

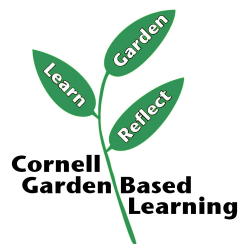

Plant	
Size	Shape
Habit	Branching Habit
Spacing	Density
