All counts are for one week. Next week will be my last visit until Sept. This is the week the aphids started showing up (outside) - about one month later than usual - so aphids up in almost every house - but if it averages out for less than 30/H per card I doubt they are actually on the plants; above 5 or 6 they might be in there. I couldn't find what is causing the holes in the leaves of the hydro is in 8 and 10 and 12 and 13 in 9. Lots of Hunter flies show up. Elise
