

Grading Rubric - to be filled out by Cecelia

Student Name

Scenario #

Overall Grade

Site Analysis		(20 points possible)
Components of analysis to be graded are ability to read a site plan (8 points), ability to understand grade/topography (7 points), understand the way the sun moves across the site (5 points)		
Total		
Program Requirements		(20 points possible)
Each program requirement for the Scenario chosen will count as one item to be graded i.e., if there are 5 program requirements, each item will be worth 4 points		
Total		
Design Principles Used		(10 points possible)
Did you use any design principles in the bubble diagram? Using any of the design principles in the moodle materials or in the handouts will result in credit. The more principles you use, the more credit you will receive		
Total		
Plant Selections		(10 Bonus points possible)
Bonus points for selecting plants - the only way to lose bonus points is to choose invasive plants or choose plants inappropriate to the location		
Total		
Comments		
An opportunity for me to point out the things I see in your design and suggest areas you may want to develop a little more
